Introduction

Overview of the NEMS Capability

The National Emergency Management Agency (NEMA) has established an ongoing NEMS capability to enhance the Australian Government's ability to better support the states and territories during a crisis.

The NEMS capability consists of:

- A national stockpile of Australian Government-owned disaster goods, including a seasonal strategic reserve of single-use consumables;
 - Including a system for the management of the stockpiled goods;
- A standing offer panel to facilitate the purchase of critical goods and services to support state and territory government responses to crises;
 - This includes a pool of disaster management specialists and non-government owned equipment which can be contracted to be available in higher risk weather season;
- Strategic partnerships with other Australian Government humanitarian and crisis response capabilities.

What is the role of the NEMS Panel?

The NEMS Panel has been set up to enable the efficient purchase of goods and services to create and replenish a stockpile of Commonwealth-owned disaster response and relief goods and services.

The NEMS Panel supports prevention and preparedness activities, through facilitating the purchase of emergency management goods and services that are ready to deploy in the event of a disaster. The NEMS Panel is accessible to authorised Australian Government, state and territory and local government agencies.

The NEMS Panel uses an often-open approach which allows NEMA to go back to industry – at any time over the life of the Panel – to tender for new or different products and services and enable new or existing entrants to the market to apply for a position on the Panel.

This Panel makes responding to and recovering from emergencies and disasters that much more effective.

This catalogue will be updated with new suppliers and their goods and services offerings as they are added to the Panel.

This catalogue does not provide pricing information for any of the goods or services offered through the Panel. Pricing information is only available to entities who are admitted as Customers to the Panel.

Current as at 26 August 2025

Customer Benefits

The NEMS Panel simplifies and streamlines the process of procuring as the suppliers have already been pre-vetted. Some of the benefits of becoming a Panel Customer are listed below:

Panel access

The visual below details the process on how your entity can become a NEMS Panel Customer. For further information please contact the NEMS Panel management team at nemspaneloperations@nema.gov.au.

Aspen Medical

Aspen Medical is an Australian-owned company that delivers comprehensive healthcare solutions across the full spectrum of health services, infrastructure and technology.

We operate in challenging environments—remote, under-resourced and high-risk—and work globally with governments, industries and communities to address urgent needs and contribute to long-term health outcomes.

Our work spans the delivery of essential health services, development and management of critical health infrastructure and integration of technologies to improve access, quality and efficiency in care. Whether establishing health programs in underserved regions, responding to health emergencies or supporting system-wide improvements, our approach is always outcomes-focused and grounded in cultural safety, clinical governance and reliability.

Since our founding in 2003, Aspen Medical has evolved from a Canberra-based start-up to a certified B Corporation recognised for strengthening health systems worldwide. Our multidisciplinary teams, comprising clinicians, planners, technologists, project managers, logisticians and policy experts, collaborate to deliver scalable, sustainable solutions that make a meaningful impact.

At Aspen Medical, we don't just deliver care, we enhance the environments that enable health. We build partnerships, develop local capacity and support the systems that keep people well—wherever you need us.

Aspen Medical offers emergency response logistics and specialist humanitarian services

Bluemont

Bluemont is an Australian owned family-based company that specialises in providing proven environmental solutions from around the world to Australia for over 20 years.

Boxwall Mobile Flood Barriers:

The Boxwall mobile Flood barrier is the fastest barrier to deploy, 100m in 30 minutes. From Sweden, proven globally, supplied locally in Australia. European technology saving us from floods, one Boxwall at a time.

Desalination:

Elemental Water Makes from the Netherlands make the first Desalination system that is 100% chemical free and can be powered 100% by solar. Supplied to more than 30 countries globally. More than 2,500,000 cubic metres of fresh water provided to more than 150,000 people in need. Containerised desalination systems that produce from 1,000 litres of potable water per day to 10,000 litres of potable water per day.

Flood Pumps:

Hytrans is the Dutch manufacturer of the Hytrans high volume dewatering system, mobile flood pumps from 20,000lpm top 50,000lpm. Providing globally proven mobile water supply capabilities to Fire Brigades and governments since 1964.

C3 Systems

C3 Systems is a veteran owned, Australian SME based in the ACT and SE QLD, with proven expertise in rapidly deployable infrastructure with our solutions and products tested and proven to excel in challenging environments.

Our deployable infrastructure systems are scalable, modular, robust, and easily transported by road, rail, water, and air with our systems having the ability to be underslung from a rotary winged aircraft. C3 Systems has proven experience in challenging and remote humanitarian and military environments.

These products will save time and money over the entire term of your deployment and help deliver exceptional capability in the field and in adverse conditions.

C3 Systems offers over 50 discreet products, including soft shelters, power generation, storage, lighting, flooring, electrical systems, fuel storage, water generation, and filtration systems. Our highly deployable, scalable, modular, robust, and energy-efficient hard and soft shelter systems are suitable for various environments, such as expeditionary and emergency accommodation. We specialize in integrating principal equipment and supporting infrastructure interfaces.

CE Bartlett

Established in 1956, Bartlett Manufacturing is a nationally and internationally recognised leader in industrial textile product manufacturing. The Bartlett business operates in Ballarat Victoria with production facilities spanning across three separate sites and four factories. Our industrial textile products are sold to a vast range of industries, with hundreds of different end uses.

We take enormous pride in our ability to adapt existing products and develop new products to meet the ever-changing needs of our customers, or to take advantage of the latest fabric technologies.

Within our industry we lead the way in developing new fabrication and sealing techniques, resulting in quality products that continually exceed customer expectations.

The continual growth of the Bartlett business and brand is based on our total commitment to service and quality, along with the ongoing re-investment in new technologies.

Global Defence Solutions (GDS)

When disaster strikes, emergency services need infrastructure that's ready to deploy, proven to work, and built to last. Global Defence Solutions (GDS) systems supply this to first responders, emergency services, and humanitarian operations across Australia. From mobile mortuaries and animal welfare units to emergency accommodation and fully equipped evacuee villages, including toilets, showers, kitchens, laundries, and water reuse systems, we deliver complete, self-sufficient solutions that provide safety and dignity in the wake of disaster.

In thirty years of operations, we have designed, delivered, and supported thousands of units of product that are reliable, fast to deploy, simple to operate, and robust enough to survive use in the toughest environments.

Our mission is to ensure your teams can react quickly, staying focused on saving lives and restoring order while operating from a safe, reliable base with everything they need to live, work, and rest.

Hannagan Solutions

Hannagan Solutions Pty Ltd is a family-owned business based in Melbourne. We are the sole distributor for the soft shelter manufacturer LANCO in Australia, New Zealand and the Pacific region and the humanitarian distributor for Dantherm Group HVAC products, Sonaray Lighting and the PACTO waterless toilet in Australia.

Our customers in Australia, New Zealand and the Asia-Pacific include national governments, state public health services, state emergency services and industrial corporations.

Our products are designed to be easy to store and simple to transport. They can be quickly deployed and set up with minimal training, are robust and safe to use in the immediate emergency response to a disaster anywhere in Australia. Our products are made to order to meet the highest quality standards. They have an expected lifetime of 7–10 years when stored correctly. We are also able to assist with cleaning, maintenance and storage at our facility in Victoria.

Humanihut

Humanihut is an Australian-owned company headquartered in Adelaide, operating across Asia Pacific, Europe, the UK, Middle East, and North Africa.

Our patented Humanihut Field Infrastructure System (HFIS) is a unique Australian innovation offering rapidly re-deployable, turnkey infrastructure for workforce accommodation, disaster relief, emergency response, refugee housing and defence. HFIS is scalable, customisable, and capable of operating on-or-off-grid, engineered for speed, adaptability, and resilience.

Designed for rapid deployment, the HFIS integrates all core components, accessories, and utilities. It connects seamlessly to local water, power, and waste systems, or functions independently when infrastructure is unavailable creating a temporary liveable community. All services are installed above ground to minimise environmental impact.

We provide end to end services from camp establishment and site management to dis-establishment, training, inspections, and maintenance; ensuring clients are always operationally ready. Our dedicated warehousing and inventory management guarantees security, maintenance, and rapid deployment of client assets, nationally and internationally.

KB Logistics

Kreskas Bros Transport (KBT) is a proud regional Victorian business, based in Shepparton, and a third-generation family-owned company with over 60 years of experience in supply chain management solutions. We specialise in line haul containerised logistics, relocatable storage solutions, warehousing of goods purchased through the NEMS Panel, and broader warehousing services. Our 70,000m² AQIS-registered facility offers cold storage, dry storage, export container packing, import container unpacking, distribution, and customised pick-and-pack solutions.

With HACCP certification, AQIS registration, and expertise in handling export and import container operations, KBT ensures all storage solutions meet strict regulatory and operational standards. We are proud to deliver high-quality container solutions backed by a strong regional workforce, ensuring critical goods are securely stored and rapidly mobilised when needed.

Krisis Protection

Krisis Protection is an Australian-owned company specialising in premium, watertight flood protection solutions. Our flagship product, the *Krisis Flood Bag*, is IPX8-certified and military-grade tested, designed to safeguard household and business contents from floodwater damage. Available in three sizes, the bags provide scalable protection for everything from personal valuables to commercial equipment.

With Krisis Flood Bags warehoused across three Queensland facilities, Krisis is uniquely positioned to support national emergency stockpiles and regional disaster responses. We also offer comprehensive warehousing, fulfilment, and inventory management services.

Built for prevention, not just response, Krisis Flood Bags empower communities, reduce recovery costs, and deliver resilience in a changing climate. Our mission is simple: protect what matters before the waters rise.

Midmed

Midmed is a Queensland-based, family-owned supplier of medical and emergency response equipment serving government agencies, hospitals, ambulance services and humanitarian organisations nationwide. For more than 30 years we have partnered with leading global manufacturers to deliver reliable, fit-for-purpose solutions for patient handling, resuscitation, infection control, field hospital infrastructure and specialist consumables. As the exclusive Australian distributor for brands such as Nutwell Logistics, Hartwell Medical, TSG Associates & Medsled we maintain local inventory and a national service and training network to ensure continuity of supply and through-life support, even in austere environments. Operating under ISO 9001, 14001 and 45001 certifications, Midmed has a proven track record supporting state and federal agencies during disaster response and recovery operations. Backed by responsive customer service and deep technical expertise, we provide the equipment - and the confidence - emergency managers need to protect communities.

OPEC Systems

OPEC Systems is an Australian-owned company with over 30 years of experience delivering specialised solutions across the defence, health, and environmental sectors. As the exclusive Australian distributor of AKS Industries' advanced shelter systems, we supply rapid-deployment infrastructure for the world's most demanding environments.

Since 1975, AKS fabric buildings have been tested and proven in over 60 countries and used across a wide range of applications—from UN disaster relief, military and hospital facilities to film locations and remote housing camps.

AKS shelters are modular, energy-efficient and are engineered for durability and speed. The highly mobile and modular XP Shelters can be fully erected in under 15 minutes by a trained crew and are ready to operate with plug-in power and optional ECU climate control. Tested to withstand extreme wind and rain conditions, AKS shelters set the global benchmark for rapid, rugged, and reliable shelter solutions for all applications.

Pipe Management Australia

Pipe Management Australia (PMA) is the exclusive national distributor and deployment partner for Geodesign Barrier Dams - a globally trusted flood mitigation solution engineered in Sweden and designed for strength, rapid deployment and full reusability.

Built for adaptability, Geodesign Dams conform to a wide range of terrain types and site conditions, making them a reliable defence for critical infrastructure, flood-prone communities and emergency response scenarios.

Proven in the field, right here in Australia, PMA has successfully delivered and deployed Geodesign Barrier Dams for flood protection at key sites including:

- Urban Utilities' Oxley Wastewater Treatment Plant: safeguarding essential water infrastructure
- Maryborough, QLD: as part of a community-wide flood response initiative by council

With over a decade of experience, PMA provides full-service delivery including:

- Site assessments
- Tailored deployment planning
- Recommended storage and holding strategies
- Client training and certification

We work closely with local councils, utilities, emergency services and state agencies to ensure the right strategy is in place before the wet season strikes. Our delivery models include outright purchase, flexible lease/hire options and Guaranteed Holding arrangements, tailored to your needs and operational requirements.

From supply and logistics through to on-ground deployment and support, PMA's turnkey capability ensures your Barrier Dam investment is ready to perform under pressure, when it matters most.

Proton Dynamics

Proton Dynamics, established in 2013, provides specialist equipment, maintenance, advisory and training services for defence against CBRNE (chemical, biological, radiological, nuclear and explosive) threats. Our clients include the Australian Defence Force, federal, state and territory law enforcement agencies, and emergency services. Proton Dynamics is a reliable and responsive partner. We ensure value for money and short lead times by sourcing, manufacturing, and servicing locally.

Proton Dynamics provide **Non-Medical Biohazard Kits** and **Body/ Recover Bags** specifically designed for the National Emergency Management Stockpile (NEMS). Our **Non-Medical Biohazard Kits** provide personnel protection from blood-borne pathogens, infectious diseases, and other biohazards often encountered during disaster clean-up operations. Proton Dynamic's **Non-Medical Biohazard Kits** are fully customisable and made to order.

Our **Body and Recovery Bags** are uniquely made in Australia using superior 140 gsm material with high-quality zippers and stitching. These bags are available in various sizes and are designed for both **human and animal remains collection**. Our bags are available at short notice and in exact quantities.

RedR Australia

RedR Australia provides expert personnel and training supporting Australian emergency management.

What we offer: Surge expert personnel for emergency management supporting organisations throughout the disaster cycle for short- and long assignments.

Hosting a roster of more than 700 experienced disaster specialists. Our experts are trained and experienced in a wide range of skill profiles, such as coordination, logistics, gender and disability inclusion protection, shelter management and DRM to name a few.

They are vetted professionals with a minimum of five years' technical experience, with most averaging 10–15 years, having worked in international and domestic emergency contexts.

We're also a leading provider of specialised training in the disaster-response sector. Our trainers have experience responding to Australian emergencies such as floods and bushfires, as well as conflict and other major events. They have extensive field experience working in a wide variety of technical, co-ordination and advisory roles across all stages of the disaster cycle.

Spearpoint Solutions & Technology

Founded in 2006, Spearpoint is an Australian, veteran owned and operated supplier of Integrated Systems, based in Queanbeyan NSW. Spearpoint offers a range of emergency management capabilities, including the DefenCell flood barriers. Used extensively in the SA Murray River floods in 2022, the DefenCell flood barriers consists of 2 types. The DefenCell geotextiles contain no metal and are easy to transport and erect. The DefenCell MAC barriers are gabion systems, inherently sturdy and easy to install. Both come in a range of sizes and shapes. Designed as flood barriers, the systems can also be used for ground stabilisation and hard standing construction. The DefenCell barriers are in extensive use with US FEMA and worldwide.

Spearpoint provides training and support for both products.
